

Was it Murder Or What is it? Police Asking

An Indian woman disappeared from Hazelton two or three weeks ago, but that is not very uncommon and the relatives and friends apparently paid but little if any attention to it. But a few days ago one of the Indians who had never been considered a candidate for an intelligent contest, told a story of having seen two white men fighting on the bank of the Skeena and later he claimed he saw the two men carry the woman down to the river and toss her in. Just what the fight was all about is still a mystery, unless it was to decide who was to have the privilege of throwing the woman into the water. The fight being a draw the two white men must have decided to share the privilege.

According to the story the fight took place several days, or weeks, before the Indian eyewitness reported it. As time went on all kinds of wild yarns have been started, such as blood stains torn shirtwaists, skeletons, etc., but as yet no trace of the woman has been discovered although the police have been looking high and low, and asking lots of questions.

One man was taken into custody, but no charge was laid against him and on Wednesday afternoon it looked as if the man would have to be allowed his freedom. Sargt. Service of the provincial police, and Corpl. Berger of the R. C. M. P., spent several days investigating the case and it was understood Inspector Spiller was coming up from Prince Rupert to take charge of the investigation. The only evidence there is to go on is the story of the one Indian.

The mounted police started the investigation and made the one arrest and then handed the case over to the provincial police. The missing woman is Kate Haxte, fairly well known in Hazelton.

GAME WARDEN WAS HERE

T VanDyke, the new district game warden for this northern district, was in the section for a few days the past week getting his staff organized under the new game act and the new system of administration. The police will no longer have anything to do with the enforcement of the game laws, but a separate staff will carry on the work. These officers will probably have some work in straightening out some misunderstandings in regard to what can be used for fishing on the lakes. The natives will not be allowed, it is understood, the use of nets on lakes less than four miles in length.

A NEW BREED OF THIEF

The sacred rights of a perfectly good automobile to contain within itself a certain amount of coils and other little things within its own boundaries has always been respected in this law-abiding country, but the fore part of the week it was discovered that coils had been removed from a car in the storage yards of the Henry Motors at Smithers had been removed without permission of the owner or of the garage people. It was embarrassing for the garage man when he went to start the car and hand it over to the owner as having been put in first class running condition. The provincial police were notified. Whoever did that little trick has established a bad precedent and he will not be at all popular with the motoring population.

QUICK NEWS

John Pearson has become the owner of a Chev. sedan.

Although a quantity of new machinery was sold in the district this season there is room for a great deal more. In fact a good 1929 crop will mean more horses and farm machinery another season.

Mr. Holland C. N. R. section formen is also driving a car and we look to see several more, before long—as there are a number who can do nicely with one.

Comparing favorably with prairie crop reports, Bulkley Valley can report wheat seeding completed, and some wheat two inches high. Oats are practically seeded, with some showing through the ground. Barley is sown in some places. Mr. Green completed sowing twenty acres on the 10th green feed and barley remaining in most cases. The weather is still cool. Rain would benefit practically everything.

The extra large number of stock on the range at this time would indicate shortage of hay. Some of these do not belong to local farmers at that and we are now wondering if parsnips will get them, or whether there is some disease that will become prevalent. Considering recent losses, by some, it may be well to look into range conditions.

It is no time to fret about low prices for dairy products. Feed is scarce and expensive. Grass at the present time is not a producer of either milk of fat or beef and merely serves to keep stock alive.

Snow is reported around Detroit Michigan on May 3rd, so we are not so worse here.

H. Lum lost a heifer by parsnips last week.

Mr. Green sold several good cows last week, at a fair price. There are far too many poor cows eating up good feed, and the improvement of stock is not being given the attention it should receive. Cattle being only instance where a vast improvement is required. Unfortunately, all these things cost money, and farming is not a get-rich-quick game.

It is possible that the chain stores, spreading this way, along the C. N. R. will reach Quick in due course.

GOT TIRED OF THE JAIL

Ed. Markstrom commonly known as the "Black Swede", was doing time in the Hazelton jail and had almost completed his sentence when he decided to hit the trail again. He was working as a gardener when the wanderlust bit him and he quietly left and failed to post a forwarding address. Up to the present writing he has not been located. It is very seldom a prisoner leaves the comforts of the Hazelton jail until his time is up.

WANTS SOME MORE POLES

N. F. Chapman, western manager of MacGillivray & Gibbs, with headquarters at Spokane, spent last week end with Olof Hanson of the Hanson Lumber & Timber Co. Mr. Chapman is interested particularly in cedar poles and has during the past number of years used a large quantity of the material from this district. It was expected that he would place an order for a number of cars while here.

IS IT WORTH WHILE?

Is it worth while for Canada to save \$22,000,000. each year, which sum is a moderate estimate of the money value of the infant lives lost each year in this country?

It is difficult to place a money value on human life, because in the first place, it seems a cold and heartless thing to do. We rather resent the fact that people that anyone should think of our own children as having a dollar value. Then there are such human elements as mother-love expended upon a child which are beyond any measure of value.

If, however, we think of the question in an impersonal way, we do find certain interesting facts. It requires money to feed house, clothe and educate a child. When the child grows to be an adult and begins to earn money, he then becomes an asset, and to the extent that he earns more than is than is required for his bare living, he is paying dividends upon the money invested in him.

An eminent American statistician, taking those points into consideration has found that the value of a child at birth is over \$9,000. This sum invested would bring in the money required to rear the child and the net income of his earning years.

Upon this basis which is sound and reasonable, we find that the twenty-two thousand babies that die each year in Canada have an economic value of over \$22,000,000. This represents a drain upon our national resources to an extent which justifies national consideration.

Public Health work is not a matter of sentiment; it is essentially the expenditure of reasonable sums of money along certain established lines of pays a dividend far beyond what is paid on any other investment. At least one-half of the \$22,000,000 now lost each year can be saved through providing the necessary public health services. Is it worth while?

MARBLE FROM THE NORTH

Native marble, quarried in Northern Manitoba, along the Hudson Bay railway, may soon replace marble from Italy. "Maniville", as the Canadian product is called, is being used extensively in the construction of the new head office building of the Sun Life Assurance Company, Montreal. Shipments were recently sent from here by the Canadian National Railways. The northern marble is of fine texture hard but not unduly so and can take a beautiful polish and a sharp arris.

VISITOR FROM PRINCE RUPERT

S. E. Parker and son Robert of Rupert arrived last Saturday night and was a guest of the editor over the week-end and while here visited via motor the Bulkley Valley and also drove down the main highway past Skeena Crossing. Mr. Parker is much enthused over the development which has taken place in the interior since his last visit a few years ago. He is particularly keen about the road being built towards Prince Rupert and rejoiced to see that it was still going towards the coast. He feels there is a hope that the road will reach its destination within a reasonable time. It will, according to Mr. Parker, be a very attractive trip for the Rupert people as soon as they can get onto the road.

Mr. and Mrs. Jack Johns of Prince Rupert were guests over the week end of Mr. and Mrs. Marintette.

Telkwa Tales

Mrs. Mapleton was an afternoon tea hostess last Monday.

John Williams has gone to Seattle to make his home.

Miss Mary Heal has gone to Vancouver on a holiday.

A carload of furniture arrived here recently from the Argentine for Mr. Cassels and family who recently arrived and settled on the Murray farm.

The provincial public works department has completed the work of widening the rock cuts on the river road going east from town. The improvement is decided and the motorists are calling the department blessed.

The roads out of Telkwa in all directions are in fine shape. The road to Morricetown is rapidly approaching a real motor road standard, that is the road via Smithers.

The bridge drive at the library in aid of the nursing home was well attended. The prize winners were Mrs. E. M. Hoops and Mr. Phillips.

LIKES OUR BRAND OF FISHING

W. A. Barnes, manager of the Orphium theatre, Vancouver, was a guest for a few days of C. W. Dawson and he got some good trout fishing. He is a fisherman and stated that he had had a wonderful time for the two or three days he was here. The fish he had heard about before coming were not all, he found, in the imagination. He will be back again some day.

COME TO NEW HAZELTON FOR 24

The prospects are good for a large number of people from the interior coming to New Hazelton for the 24th of May celebration, particularly for the dance at night, and for the drive over the road. The committees in charge of the celebration have about completed their work and promise a good afternoon's sport for adults as well as for the youngsters. Besides the usual line of races there will be two ball games, junior and senior between New Hazelton and Smithers, a tug of war between Hazelton and New Hazelton and then the big dance at night.

CONTROLLING TRAFFIC EASILY

The Village of Smithers made a very careful study of how to control motor traffic in the most economical manner and a most effective system has been evolved. Its effectiveness is due to its simplicity. The public works department of the village simply laid down on the job and let the main roads go. The side roads of course are not expected to be motorable. Anyone who has any respect for his or her car just naturally cuts down gas consumption as soon as Smithers is reached, unless one is chasing a bandit or rushing to relieve someone suffering.

RETURN SUMMER EXCURSION TICKETS ON SALE

The Canadian National Railways have now on sale very low round trip Summer Excursion tickets to Eastern Canada and United States points, and also Triangle Tour tickets to Jasper National Park routed Jasper, Vancouver and Prince Rupert, or in opposite direction. Full information, dates of sale, limits, etc. from any agent, Canadian National Railways.

Carloads Supply For Silver Cup Widening Road

Road work is one of the big jobs at the Silver Cup mine at present. The frost has been coming out on the upper end and has made transportation for the big trucks somewhat hazardous. Rather than have a truck load of concentrates and a man go down the steep bank to the Salmon river it was decided to curtail shipments briefly until the road was widened a little. All available men are now on the road for a short time. The Silver Cup mine received this week a carload of mine timber and some siding, a carload of fuel oil and a new supply of chemicals. In a short time the company's garage is to be moved to the mill and a little later on the office will also go up to the mill. This will centralize the entire plant and cause a considerable saving in overhead. A telephone line between town and the mine is to be installed in a short time. Mr. Dornberg is expected back a week from Saturday night and when he goes back to Vancouver again it is expected that the Silver Cup will be away on a permanent manufacturing or producing basis. The big construction program has been completed and all that is left to do is to take out the ore, mill it and ship it to Trail and then clip coupons. Up to the present the work has been a great success. Stockholders will get more tangible evidence in the near future.

WATERTON LAKES FAMOUS FOR TROUT

Excellent fishing may be enjoyed in the National Parks of Canada, especially in the Waterton Lakes park, Alberta, which is famous for its trout. Specimens of trout weighing as much as fifty pounds have been taken from Waterton lakes.

On Tuesday morning the police were notified of the death of Mike Banek at Andimaul. As the deceased had not been attended by a doctor, the police and Dr. L. B. Winch went down to Andimaul to investigate. It was found that death was due to natural causes.

Hugh A. Harris who has been in charge of the Mohawk property on Four Mile mountain for some months, left the first of the week for Vancouver to consult with the management of the company.

A party of four big game hunters arrived at Hazelton on Thursday for a trip into the Groundhog country for a shot or two at the grizzly. George Biernes had charge of the party.

AGRICULTURE PROSPERS

According to the primary estimate, British Columbia in 1928 broke all previous records for revenue from its farming industry, with a total production value of \$79,020,000, a striking advance over the \$76,999,000 total of 1927, which was the highest on record up to that time. Virtually every branch of the farming industry of the province shared in the advance registered in the twelve months, this steady permanent gain in all departments being the notable feature of the year's record signifying a development on a broad foundation. The poultry business recorded the biggest gain in the year, though there were substantial advances at the same time in the values of dairying, stock grain and field crops. Financial News.

A Letter From the North

From a logging camp in northern British Columbia a letter comes in which the writer, a camp cook, says he has used Pacific Milk for four years.

"I find it makes the most delicious creamy puddings and sauces."

This is an excerpt from a long letter that we are very glad to acknowledge.

STRENGTH OF FIRE-KILLED TIM- BER

Recent tests at the Department of the Interior's Forest Products Laboratories, Vancouver Branch, show that fire-killed western cedar poles have practically the same strength as those obtained from green trees, provided there are no other defects.

AGRICULTURE PROSPERS

According to the preliminary estimate, British Columbia in 1928 broke all previous records for revenue from its farming industry, with a total production value of \$79,020,000, a striking advance over the \$76,999,000 total of 1927, which was the highest on record up to that time. Virtually every branch of the farming industry of the province shared in the advance registered in the twelve months, this steady permanent gain in all departments being the notable feature of the year's record signifying a development on a broad foundation. The poultry business recorded the biggest gain in the year, though there were substantial advances at the same time in the values of dairying, stock, grain and field crops—Financial News.

There will be no daily mail service in Northern British Columbia, according to the postmaster general at Ottawa. Mr. J. C. Brady, representing this vast territory, has been trying his utmost to get this service for the north. But the postmaster general remembers the request of a Liberal organ in Prince Rupert that Northern B. C. be punished for electing a Conservative. How easy it is for Ottawa to grant that request, and keep on granting it. Hon. Mr. Yenoit is a big man, nearly as big as some of his supporters in Northern B. C.

TO MERCHANTS IN SMALL TOWNS

The following was taken from a radio talk given by John H. Casy in the University of Oklahoma school of journalism. He is quoting the statement of the advertisement manager of one of the countries biggest mail order houses "We have a bureau whose duty is to read each week the country newspapers from all over the land. This bureau looks over these newspapers and when we find a town where the merchants are not advertising we immediately flood that country with our literature. It always brings results far in excess of the same effort put forth in territory where the local merchants use their local papers."

HOW THE PRINTERS DEVIL WON THAT DESIGNATION

In the early days of printing this art was much of a mystery, and ignorant people thought the printer evoked the aid of the powers of evil. Aldus Manutius, the famous Italian printer of the sixteenth century, went to Africa on an exploring expedition and brought back with him a very black negro boy. Negroes were a rarity in Italy then. The report immediately gained circulation that the printer had been employing the black art in his work, and that the pickaninny was in reality the imp of satan. He was called the "Little Black Devil." The charge became so serious that the printer was forced to exhibit the negro in public. In his announcement he said:

"Be it known to Venice that I, Aldus Manutius, printer of the Holy Church and of the Doge, have this day made public exposure of the printer's devil. All those who think he is not flesh and blood may come and pinch him." Thus originated the term, "printer's devil."

The melting waters from the Columbia ice fields in Jasper National Park feed the sources of three of the largest and most heroic rivers in the Canadian West—the Athabaska, the Saskatchewan and the Columbia which flow into three oceans.

YOU AND YOUR TOWN

If you want to live in the kind of town like the kind of town you like, You needn't slip your clothes in a grip. And start on a long, long hike. You'll only find what you left behind. For there's nothing that's really new, It's a knock at yourself when you knock your town, It isn't the town, its YOU. Real towns are not made by men afraid. Lest somebody else get ahead; When everyone works and nobody shirks. You can raise a town from the dead. And while you make your personal stake, Your neighbor can make one too. Your town will be what you want to see, It isn't your town, it's YOU. (Author unknown.)

Advertised Goods Are Lower

ADVERTISING turns over stocks rapidly, and therefore multiplies profits. This means that prices in a shop which advertises can be short rather than long.

Of this you may be sure: Prices in a shop which advertises are not MORE than in a shop which does not advertise. The chances are that they are oftentimes lower.

This, also, is generally true: You will find better goods, better values and better service in those shops which turn over their stocks rapidly. This means, as a general thing, shops which advertise.

A NOTE TO MERCHANTS

Advertising costs you nothing—it is paid for by the profits of increased sales.

Advertising is easy—it is simply saying in writing what you say to your customers in your shop. Turn over stocks quickly, if you would make more money.

Mr. and Mrs. J. R. Elfred of Prince Rupert were in town a few days last week end.

Jas. H. Thompson was up from Rupert last week for a couple of days to open the cottage at Lakelse.

Mrs. Donald Bruce who has been on an extended holiday with relatives in Scotland has returned to Terrace and is again on the farm north of town.

Word has been received by friends in Terrace that Henry Defontaine who left here a year ago for France with his wife and family, has returned to the middle west and when a suitable home is found he will bring his family back to Canada.

The change in the train service went into effect last Sunday. The postmaster is pleased that there will be no Sunday mail during the summer.

E. J. Large, formerly of Terrace and now of Prince Rupert, spent a few days in town last week.

Rev. and Mrs. Gibson, Mrs. Elvitt, R. L. McIntosh spent last Saturday at Lakelse Hot springs.

Engineer Cotton was down from Smithers inspecting progress of public works in this district.

The W. A. sale on Saturday afternoon was fairly well patronized.

Walter Warner, telegraph operator at Kallum Lake, was in town over the week end.

The roof of T. J. Marsh's home was on fire last Saturday afternoon, but was discovered by Mr. Chapman who was painting the house, before any serious damage was done. Many of local people were on hand to lend assistance.

Mr. and Mrs. Jack Johns of Prince Rupert were guests over the week end of Mr. and Mrs. Marintette.

The adjourned police court case of an infraction of the game act was held on Saturday evening when a Prince Rupert lawyer was in attendance on behalf of the accused. One of the accused was found guilty and fined. The furs involved in the case were of a value estimated at \$700. Another charge was dismissed for a lack of evidence.

J. Butler and Inspector VanDyke of Prince Rupert were in Terrace in connection with police court work over the week end.

Ernie Allister of Prince Rupert is a guest of his uncle, Arthur Carr.

Joe Felber who has spent the last few summers in this district prospecting, has returned for another season in the hills. He wintered in Vancouver.

The new Lakelse Hotel is well under construction and the proprietor, J. B. Johnstone, expects it will be ready to open in another three weeks. It is a 17 room building and equipped with modern conveniences and comforts.

The open air dance held Friday evening last at the tennis court was attended by a large number of people.

tended by a large number and a very jolly time was spent. Excellent music was provided by a four piece orchestra.

Mrs. Geo. Little entertained at bridge on Wednesday evening. There were seven tables. Prizes were won by Mrs. E. D. Judson and Jas. Smith, while Mrs. Duncan and Mr. Judson received the consolation awards.

Rev. and Mrs. Gibson of Prince Rupert spent a few days last week guests of R. L. McIntosh. Mr. Gibson went on to Smithers Monday night and returned to the coast on Wednesday.

CAN NOW TELEPHONE FROM MOVING TRAIN

Canadian National Railways conduct successful trial before large audience.

A successful attempt to carry on a conversation from a given number in the city, was made on May 5th., by the Canadian National Railways. The operation was as simple as that a subscriber would use in making a long distance call and the conversation was quite distinct, also the train was travelling about twenty miles an hour at the time.

The experiment took place outside of Toronto and was carried on while the train was proceeding for a considerable distance westward. The first call was put in by W. D. Robb, vice president of the Canadian National Railways, who talked with W. G. Barber, General manager of the Canadian National Telegraphs. Mr. Robb was on board the train and Mr. Barber at the head office of the telegraph department in the heart of Toronto. Subsequently various newspaper men and officials on board the train also spoke. In addition a telegram of congratulations from Sir Henry Thornton, President of the Company, was delivered to those on board the train and was received quite distinctly.

A novel feature was the fact that Mr. Robb's conversation telephoned from the train was transmitted from the telephone in Toronto to the microphone of CNRT, the radio station of the Canadian National Railways in Toronto, and broadcasted by that station and received through the receiving set on board the train from which Mr. Robb was speaking.

In addition to the officers of the company and the Bell Telephone Company, the experiment was witnessed by a large group of newspaper men from eastern Canada and the United States.

IMPORTANT FOSSIL BEDS

The Red Deer valley of Alberta is exceedingly rich in fossil remains of dinosaurs and other extinct vertebrate animals, which are being slowly exposed by erosion of the sides of the valley. It is the most productive collecting field in Canada and has already yielded much new and well preserved material to the museums at Ottawa, Toronto, Edmonton, and New York.

WOMAN'S INSTITUTE BUSY

Taking Prominent Part in Many Undertakings for the good of Terrace

The regular monthly meeting of the Woman's Institute was held on Tuesday evening, May 14. Mrs. Chas. Gigg occupied the chair. A vote of thanks to Mrs. F. M. Hall for faithful services was passed. A committee to revise the fall fair prize list was appointed as follows:—Mrs. Ross, Mrs. Wm. Robinson, Mrs. Kirkpatrick, Mrs. McLeod and Mrs. Dover. It was decided to discontinue serving refreshments after the meetings during the summer months and to start the meetings at three instead of 3.30. The secretary was instructed to write the Board of Trade promising co-operation in the removal of garbage on the side of the road near the bridge which at present was an eyesore. A report of the hospital board meeting regarding the X-ray machine was presented by Mrs. H. L. Smith. Plans for May 24 were discussed and the institute is going to serve refreshments on the ball grounds. Mrs. Kirkpatrick will be in charge and will select her own committee. At next month's meeting the question of health will be discussed along lines suggested by the provincial health officer.

Friends and acquaintances of A. H. Brunsing were shocked to learn that he had passed away on Sunday morning at the highway road camp after only a few days illness at Copper City. The deceased who was over sixty years of age was a native of Esson, Germany but has spent most of his life in Canada. He complained of a pain in his head early Saturday evening and before medical aid could be procured he had passed away. He is survived by a widow and to her is extended sympathy. The funeral was held on Monday with interment taking place at Kallum cemetery. Rev. A. W. Robinson conducted the services.

PARKS ATTRACT FOREIGN TOURISTS

Under the policy of development and publicity being carried out by the Dominion Government the national parks are not only rendering a wider service each year to Canadians themselves but they are adding to the knowledge Canada abroad and attracting to the Dominion thousands of visitors from other countries in every part of the globe.

DARYING AN IMPORTANT INDUSTRY

Dairying is one of the oldest and one of the most important of the industries of Canada. It owes its modern development to introduction of the factory system for the making of cheese and butter, to the invention of the centrifugal cream separator, and to the facilities afforded by improved methods of cold storage.

The Outstanding CHEVROLET

J. B. Agar, Terrace, B. C.

PRODUCT OF GENERAL MOTORS OF CANADA, LIMITED

THE TUBER UNIT METHOD OF CONTROLLING POTATOE MOSAIC

It has been the experience of growers of Certified Seed Potatoes that ordinary field roguing practices do not control mosaic satisfactorily. Varying percentages are now showing in strains which have enjoyed a record of freedom from this disease for many years. In others, alarming amounts have been noted and yearly increases true of Green Mountains. The grower confronted with this difficulty must decide whether to continue fighting mosaic or to replace his seed stock with a healthier strain. The latter course is to be recommended if the occurrence of mosaic much trouble or made certification difficult. However where small amounts are present it has been demonstrated by the Division of Botany, Experimental Farms Branch, that careful seed plot selection by the tuber-unit method will effect control of mosaic. Those desiring to prove their seed potatoes in this way should stake a number of healthy plants. The crop from these is hand dug and set aside for tuber uniting the following year. Bin selection may be resorted to. However, this is not to be recommended except where the stake

ing was overlooked the previous year. The size of the plot will be governed by the requirements for the next years seedling. A seed plot of one acre should provide sufficient material for ten acres.

According to the tuber unit method potatoes weighing from five to eight ounces are cut lengthwise into four equal sets. These are planted consecutively in a unit of four hills. To prevent mixing the units, a space of two feet or more separates the sets of one tuber from those of the next in the row.

During the growing season the weak and diseased plants are rogued out, along with the remaining members of the unit in which they occur. In order to prevent contamination this plot should be isolated from other potatoes. Each hill is dug separately by hand, and the most desirable tubers are selected from each unit for another seed plot. The culls are then graded out and the remainder set aside for next years main crop.

Having once established a disease free strain the seed-plot may adjoin the main field.

The amount of work involved in the above method is small and more than compensated by the satisfactory results obtained.

Home Economics

by Barbara B. Brooks

Why not open the windows these bright mornings and let the sun pour in on the breakfast table? The members of the family will anticipate the meal more and probably will hesitate to miss it. The table can be made cheerful with spring blossoms or flowers, gay linen and decorated china.

The interested homemaker makes a varied breakfast to those who dine at her table. When the family tires of toast for breakfast—try hot breads. No sooner thought than done because they are easy to prepare. It does not take over ten minutes to assemble and mix the ingredients. Served with fruit and a hot drink, hot breads form a delightful meal.

For breakfast we usually choose a muffin, or a biscuit. There are some who think muffins are a trouble, while they really are the easiest of quick breads to make because it is speed in both preparation and mixing which insures a good muffin. The ingredients should be mixed only until the last bit of flour has disappeared. The batter may look lumpy, but do not beat out the lumps, because over beating causes the muffin to be tough, to have holes running from the bottom to the top, and to have peaks. A good muffin has a rather rough well browned crust and a slightly rounded top. The batter may be mixed the night before, put in the greased muffin tins, covered with wax paper and put in the ice box, all ready for baking the next morning. This recipe for all bran muffins may be varied sometimes by the addition chopped dates figs, raisins and nuts.

MUFFINS

- 1/4 cup of sugar.
- 1 egg.
- 1 cup sour milk
- 2 tablespoons shortening.
- 1 cup all-bran
- 1 cup flour.
- 1/2 teaspoon soda.
- 1 teaspoon baking powder.
- 1/2 teaspoon salt.

Cream the shortening and sugar. Add the slightly beaten egg and milk. Add the all-bran. Sift the flour, soda, baking powder and salt and add the first mixture, stirring only until the flour disappears. Bake in greased muffin tins in a moderate oven for twenty minutes.

If sweet milk is used in the above recipe, omit the soda and use three teaspoons baking powder.

Have a surprise for the family some morning and make honey date biscuits. Put out the baking powder biscuit dough. Make a paste of 1/4 cup of honey creamed with 1/4 cup of butter. Add 1/4 cup chopped dates, 1/4 cup chopped nut meats and 1/4 cup of All-Bran. Spread this mixture on the biscuit dough and roll like a jelly roll. The roll can be made the night before, covered with a cloth and put in the ice box to chill. Cut into 1/4 inch slices. Bake on a buttered sheet twenty five minutes in a hot oven. Biscuit dough should not be mixed for a long time—just sufficient to slightly blend the materials.

Waffles may be used for the breakfast, luncheon or supper menu. They are delicious when served with a strawberry honey sauce.

There are so many bright waffle sets with which to make the breakfast table gay. The batter may be put in the pitcher and poured on the waffle iron at the table and thus the hostess will be able to spend all the breakfast hour with her family.

WAFFLES

- 1 1/2 cups flour.
 - 1 teaspoon salt.
 - 1/2 teaspoon sugar.
 - 4 teaspoons baking powder.
 - 1/4 cup all-bran.
 - 2 eggs
 - 1 1/4 cups milk.
 - 4 tablespoons melted shortening.
- Sift the flour, salt, sugar, and baking powder together; add the all-bran,

the well beaten egg, milk and melted shortening. Beat well bake in hot waffle iron.

STRAWBERRY SAUCE

Cream two tablespoons of butter with one cup of honey. Add slowly two thirds cup of crushed strawberries. Stir until thoroughly blended.

A TEASER

No. 9, Cleopatra—215 yards, Par 3.

215 100

The ninth hole of the Jasper Park Lodge Golf Course, Jasper National Park, Alberta, over which the amateur championship of the Royal Canadian Golf Association will be played August 19-24 this summer, is one of the trickiest in Canada. The championship tee (No. 1) is considerably elevated and the green, which is very fast, is also built up high. The trick, therefore, is to play a tee shot which will hold the green. Yawning traps surround the green to eat up the strokes of the golfer who fails to play this hole properly. Like its famous namesake, "Cleopatra" is likely to wreck a lot of reputations at Jasper in August.

Co-incident with the Canadian Amateur the Western Canada Amateur will be played over the Jasper Park Lodge Course, and this will provide plenty of competition for those whose high handicaps automatically keeps them out of the Dominion event.

The upper photograph was made from No. 1 tee. Below it is a plan to scale showing the hole in detail with the three tees plainly indicated. The figures below represent the yardages.

"That's a perfect Combination, John. I'm so glad you got that B-H book."

"It was your idea, dear, I was the doubting one, but I'm certainly convinced now—and I'm a bit proud of my painting ability, too."

"Don't take too much credit, John, remember what the paint man said about B-H 'English' being easy to use and covering so well."

HOW THE PRINTERS DEVIL WON THAT DESIGNATION

In the early days of printing this art was much of a mystery, and ignorant people thought the printer evoked the aid of the powers of evil. Aldus Manutius, the famous Italian printer of the sixteenth century, went to Africa on an exploring expedition and brought back with him a very black negro boy. Negroes were a rarity in Italy then. The report immediately gained circulation that the printer had been employing the black art in his work, and that the pickaninny was in reality the imp of satan. He was called the "Little Black Devil." The charge became so serious that the printer was forced to exhibit the negro in public. In his announcement he said: "Be it known to Venice that I, Aldus Manutius, printer of the the Holy Church and of the Doge, have this day made public exposure of the printer's devil. All those who think he is not flesh and blood may come and pinch him." Thus originated the term "printer's devil."

Letters to Editor

To the Editor, Omineca Herald.
New Hazelton, B. C.

Dear Sir—For many years the archives Department of British Columbia has been collecting the records of the pioneers and has amassed a great quantity of manuscript material, photographs, etc. which forms a wonderful repository of historical information and it is also a tribute to the memory of our pioneers. It is well that there should be in the Capital of the Province a Department, one of whose duties is the collection and reverential care of material relating to those who pioneered in our great province and laid the foundations for our present prosperity. In your district there may be some pioneers or their descendants who have in their possession original letters, diaries, account books, journals, note books, photographs of other material which ought properly to find a resting place in the Provincial Archives. If so I beg to make an appeal to them to deposit the same with the Department, which would be proud to receive them and to take every possible care of them for all time. All too often the original manuscripts of other cases they are simply buried away and forgotten, and there is in any case always a danger of loss by fire, whereas at Victoria the documents are kept in an absolutely fire-proof building. No matter how trivial or unimportant certain papers may seem to their owner, they have a distinct value in after years. The under from any persons in your district having any class of the above mentioned material in their possession, with a view to the same being acquired by purchase or gift for the Provincial Archives

Yours sincerely
John Hosie
Provincial Archivist

A HARD PAR 4

No. 8, Tekarra's Cut—430 yards, Par 4.

Many hopes for a fine score have been wrecked by hole No. 8 of the Jasper Park Lodge Golf Course, Jasper National Park, Alberta, over which the Canadian amateur championship of the R.C.G.A. will be played from August 19th to 24th this summer. It is a dog-leg with a high knoll to be negotiated before the second shot can be placed on a sloping green that is lightning fast and guarded by a deep grass covered ditch. The contour of this green is such that an error of a fraction of an inch in putting means disaster.

Co-incident with the Canadian Amateur the Western Canada Amateur will be played over the Jasper Park Lodge Course, and this will provide plenty of competition for those whose high handicaps automatically keeps them out of the Dominion event.

The upper photograph shows the fairway just below the elevated tee. Below is a sketch to scale showing the hole in detail. Play in the tournament will take place from No. 1 tee.

Sunshine and Showers—New Version

Above is an interior of the men's smoking-room, below a view of the rear end of the "solarium" car. The lady on the right demonstrates the shower bath.

Over ninety thousand dollars has been spent on each of the new "Solarium" cars designed for use on the long-distance all sleeping car trains of the Canadian Pacific Railway. Fifteen of them have been built at the Company's Shops at Montreal, and the one pictured above; the River Thames, will be one of those in use on the Trans

Canada Limited. These cars are given over entirely to the use of the passengers and contain, among other things, two green-tiled shower baths, a ladies' lounge, a large smoking-room, an observation lounge and a Solarium. This latter, which takes the place of the open platform is glazed with vitreous glass which admits all the beneficial sun rays, and permits an unbroken

view in luxurious comfort. The main observation lounge and the ladies lounge are furnished in various tapestries. The smoking-room and the Solarium in soft leather, blue and red in the smoke-room and sand colored in the rear compartment. A small buffet will provide refreshment as auxiliary to the dining car which is also of new and novel design.

CEDAR POLES WANTED—All sizes, 5 inch 20 feet and larger. Inspection at loading point. Cash payments—Alberta Pacific Timber Co., Vancouver, B. C. 44-48

Murdoch McLeod, registered optometrist, will be at New Hazelton Tuesday forenoon, June 18 and at Hazelton in the afternoon. 47-4

Mrs. Robt. Tomlinson left Wednesday night for Winnipeg where she will spend a holiday.

T B. and Mrs. Campbell returned to Hazelton on Thursday of last week and have taken up their residence for the summer. They spent the last few months in Winnipeg.

W. B. Dornberg and Mrs. Dornberg went to Vancouver last week where Mr. Dornberg will remain for a week or so and then return to the Silver Cup property which is now shipping concentrates.

The Beament cut off on the main high way is now open to traffic and the old road over the railway and the bad hills has been abandoned. The new road is a great improvement and in a week, after the gravelling has been completed, this will be a dandy piece of road.

In the Bulkley Valley this year the main grain crop will be oats. The wheat acreage will be smaller as the price of oats has been generally higher locally than wheat. The country appears to be in a very prosperous condition but some heavy rains are necessary before any big growth will get started.

Special services were held in St. Peter's church last Sunday, it being Whitsunday. Mrs. Lovett sang as a solo "Be Thou Nigh." Mesdames Myros and Proctor sang as a duet "Come Holy Spirit."

Among those who passed examinations at the University of British Columbia were Jim Parker, son of S. E. Parker, and Bob Matheson, both of Prince Rupert. They took the second year in applied science.

A party of timber cruisers arrived at Hazelton the first of the week and left for the headwaters of the Skeena to cruise the timber stand in that big country.

A number of the fellows from Hazelton left Sunday for Spring hill on the Telkwa road to join the water rights survey party which is continuing the work started last season. After finishing the Bulkley the party will move over to the Babine river. Mr. Frame is in charge of the party this year.

Mr. Munson of Chicago, one of the financially substantial big game hunters, arrived at Hazelton Wednesday morning and left at once for a trip to the headwaters of the Skeena and the big game district.

Miss J. Ford left Wednesday night for the east for several months. During her absence she will probably take a post graduate course in Toronto.

James Kennedy and family have returned to Smithers and it is understood that he will re-enter business at his old stand. Jim is only one more of the many who are returning from the United States to the country where the opportunities are greater and life is easier.
